

Validation Checklist

This course will use the Dimension Vista Systems Quick Reference Guide, Vista Systems software simulation and PEPconnect as training resources.

The student places a checkmark beside the competency when it is completed. When all competencies are checked, the instructor and operator sign and date below as a record of completion.

Topic/Tasks	Completed
System Overview	
Identify major hardware components	
Identify and navigate the routine software screens	
Daily Setup	
Clean sample handling area and inspect sample racks	
Replenish supplies and empty waste	
Discuss Off- Peak Activities to optimize workflow	
Sample Processing	
Identify surplus and limited racks	
Process various types of samples	
Demonstrate use of manual order entry	
Demonstrate use of problem sample screen to resolve problem samples	
Identify and interpret test report messages	
Quality Control Processing	
Order Quality Control	
Discuss Quality Control alerts	
Calibration Processing	
Order a manual calibration	
Order a calibration from a cup	
Review calibrations	
Integrated Multisensor Technology (IMT)	
Describe the function of the IMT System	
Water Purification Module (WPM)	
Identify components of WPM	
Weekly Maintenance	
Practice cleaning the Reagent baseplate	
Practice cleaning the IMT sample port	
Troubleshooting Basics	
Navigate the Process Errors Troubleshooting software	
Describe locations of common errors
